

Rapid Assessment Of Security

INTRODUCTION

Serious financial damage has been caused by security breaches, but because there is no standard model for estimating the cost of an incident, the only data available is that which is made public by the organizations involved. "Several computer security consulting firms produce estimates of total worldwide losses attributable to virus and worm attacks and to hostile digital acts in general. Rapid assessment of security is the way to help you to know if your company had attacks or not and what protection you need.

**80% OF THE COMPANIES IN THE WORLD
HAVE BEEN HACKED**

**DON'T LET YOUR
COMPANY BE ONE OF THEM**
